1) Write a 100-word email to developers with PoC

Subject: PoC Attached – Identified Security Vulnerabilities

Dear Development Team,

During the recent security assessment, we identified multiple vulnerabilities that require your attention. The Proof of Concept (PoC) demonstrating the exploitation scenarios and potential impact has been documented for better understanding and validation.

Please find the attached file **Vulnerability_List.pdf & Vulnerability_POC.pdf**, which includes detailed findings, affected components, and evidence screenshots. We recommend reviewing the PoC carefully and prioritizing remediation based on the severity outlined.

If you need any clarification or support during the fix implementation or retesting phase,feel free to reach out.

Regards,
Suresh Kumar P
VAPT Team
